

Restaurant Cloud-Based POS Software Made Simple

Manages all your restaurant operations efficiently so that you can focus on growing your brand, like a real boss!. Transform your restaurant, cafe or hotel with contactless menus which are integrated with end-to-end order management solution.

Save money on expensive POS Machines!

Web-Based POS Software, ITSWSPOS is designed specifically for the restaurant industry, offering a comprehensive solution that addresses the unique challenges faced by restaurateurs.

Focusing on eliminating bulky POS machines and transforming operations to mobile devices is a great approach. ITSWSPOS can lead the transformation in the restaurant industry, offering a modern, efficient, and customer-friendly POS solution.

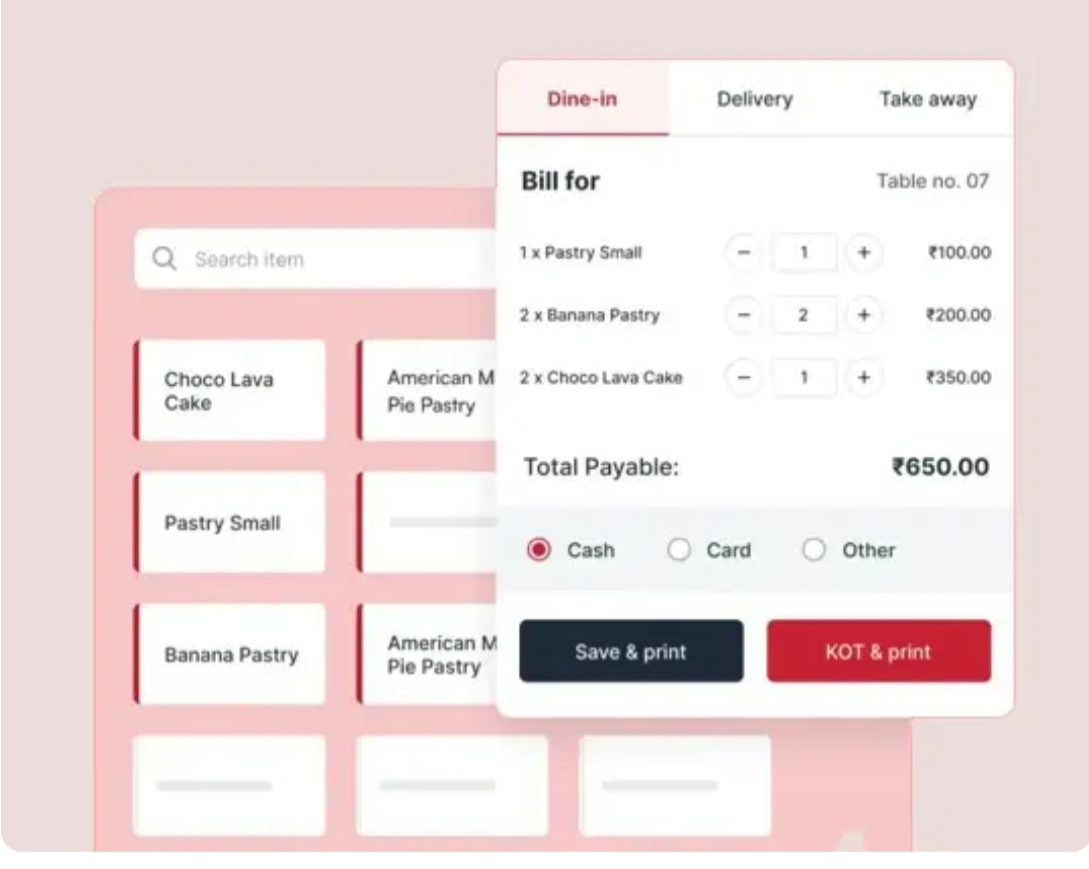

Our mission is clear: By transforming to a mobile POS system, ITSWSPOS can significantly reduce costs associated with traditional POS machines while improving operational efficiency and customer satisfaction.

SMART WEB-BASED POS SOFTWARE FEATURES

A restaurant POS made for all your needs

All the features are available to all clients from food-truck to 5-star restaurant. We believe in equality and want everyone of our clients to get the same privilege.

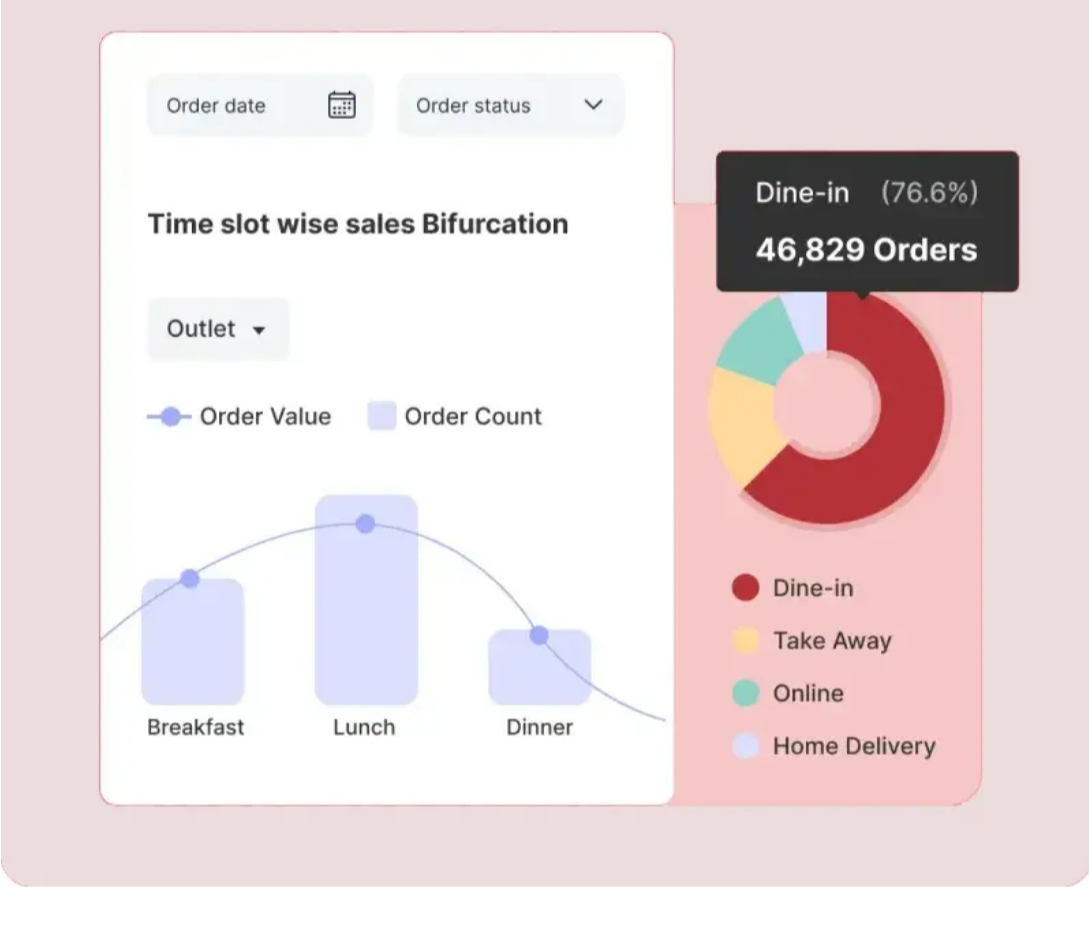

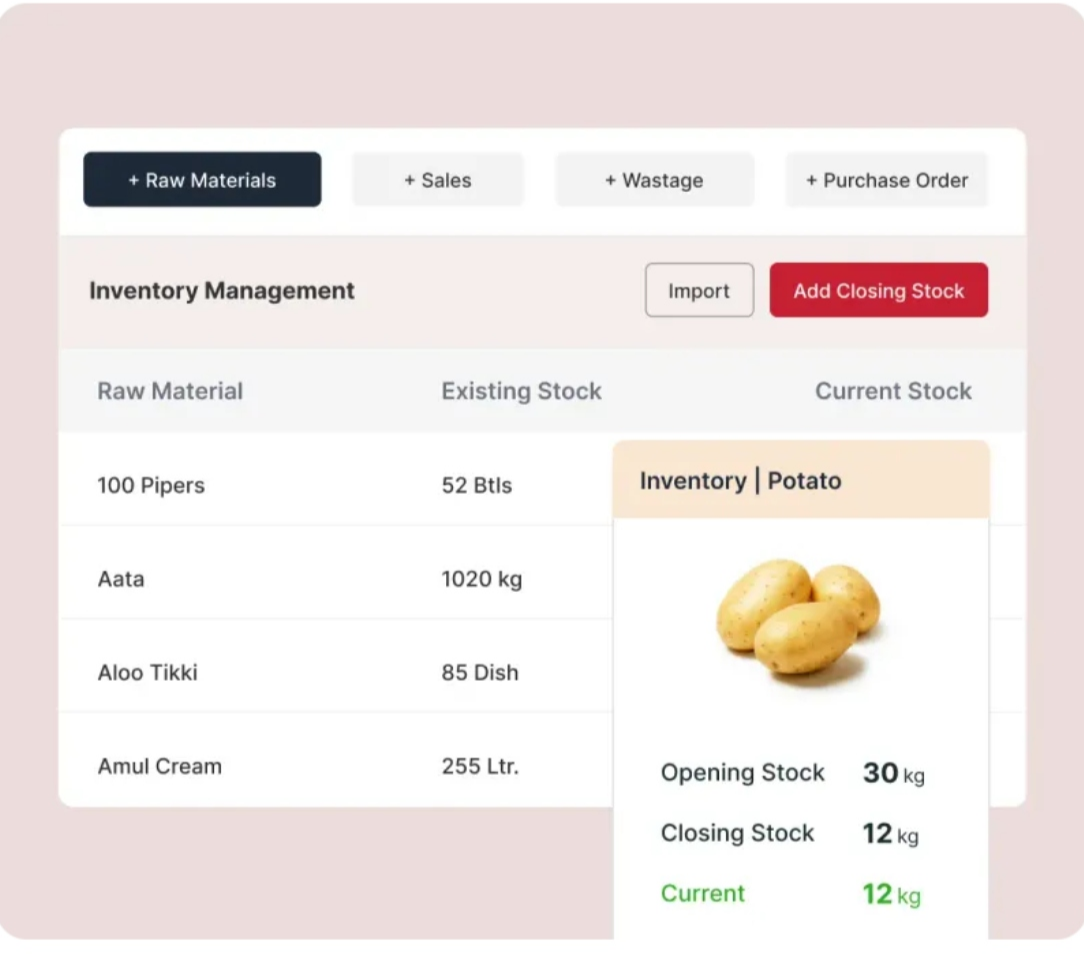

A quick 3-click restaurant billing software

Take orders, punch bills and generate KOT. Accept payments either by splitting bill or merging tables. Easily apply discounts and coupons. All of this, and more, is easy and quick with ITSWSPOS's restaurant POS. Explore all features

Restaurant Inventory management made easier

Do inventory management the smart way. Put your inventory on the item-wise auto deduction, get low-stock alerts, day-end inventory reports and more with ITSWSPOS restaurant POS

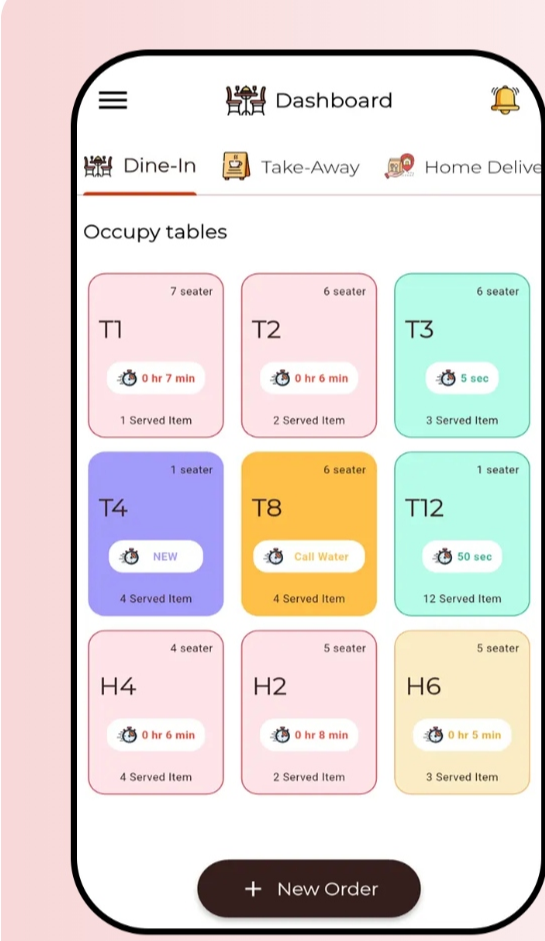

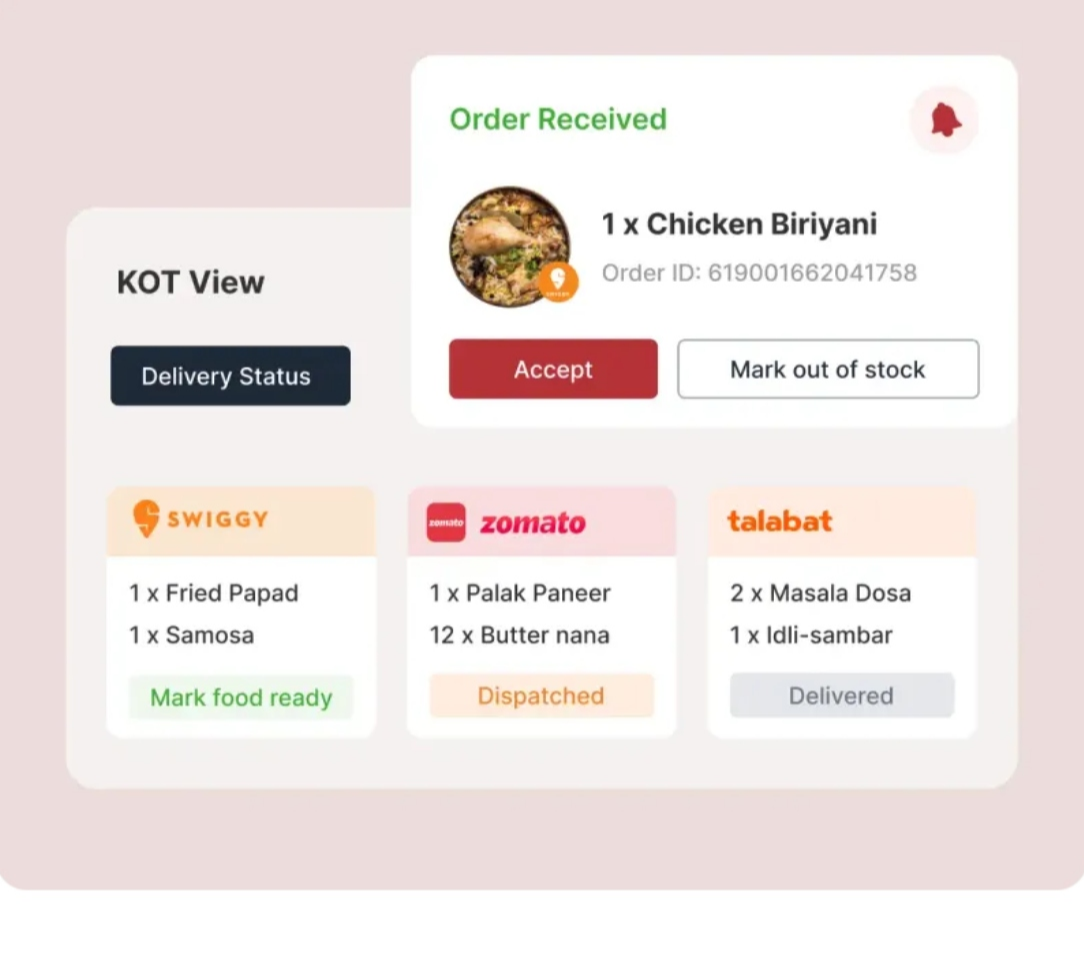

Get real-time restaurant Reports

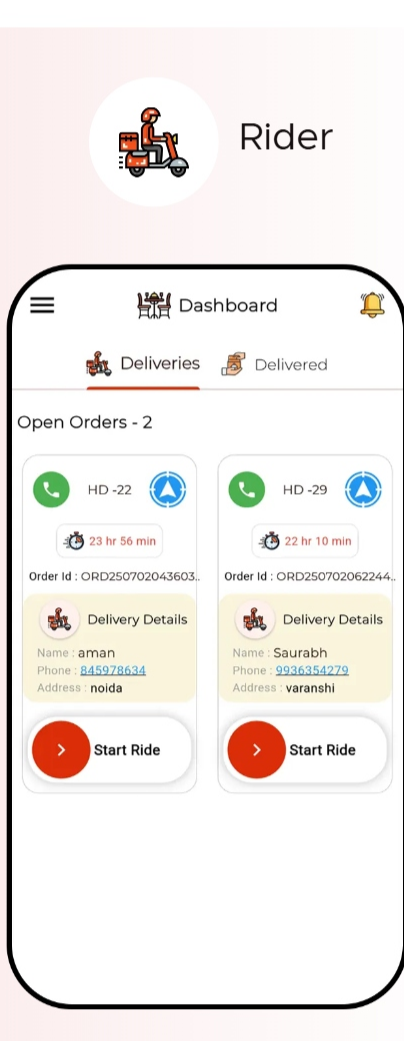

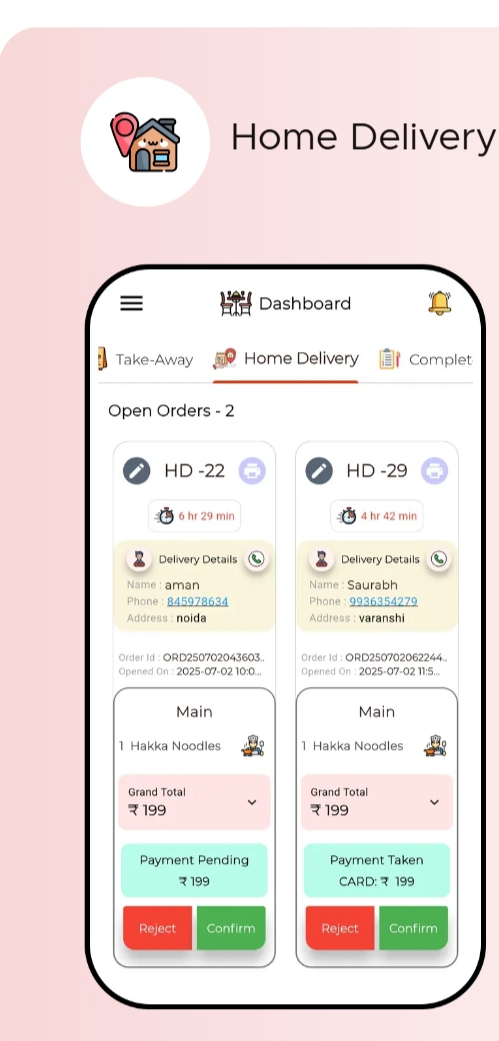

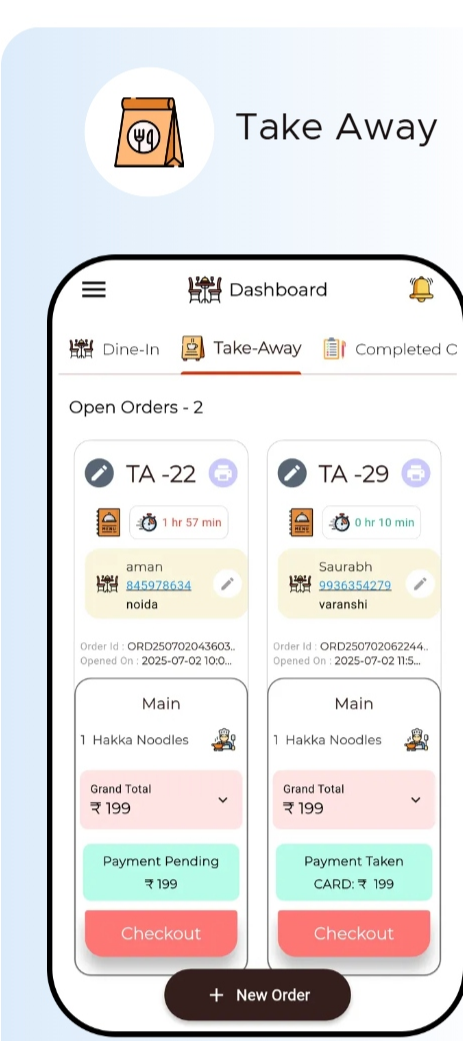

Automate your restaurant reports and go paper free! Let ITSWSPOS POS automatically track your business activities and provide you error free reports on your restaurant's day-end sales, online orders, staff actions, inventory consumption, and various 80+ essential business reports

A single Online Ordering System to manage all your orders

Accept online orders, manage online menu, mark food ready, collect payment and check revenue without shuffling between multiple screens
